## **Program Overview**

This section summarizes the end objectives of the program along with its duration.

#### **Training Outcomes**

At the end of the program, the learner should have acquired the listed knowledge and skills:

- Demonstrate the Process of performing through-hole assembly on PCB components.
- Explain the importance of following inclusive practices for all genders and PwD at work.
- Demonstrate various practices to be followed to maintain health and safety at work.

#### **Compulsory Modules**

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

| NOS and Module Details  | Theory<br>Duration | Practical<br>Duration | On-the-Job<br>Training Duration<br>(Recommended) | On-the-Job Training<br>Duration<br>(Mandatory) | Total<br>Duration |
|---|--------------------|-----------------------|--|--|-------------------|

### **Module Details**

### Module 1: Perform through-hole assembly on PCB components Mapped to ELE/N5113

#### **Terminal Outcomes:**

- Role and responsibilities of a Through Hole Assembly Operator.
- Demonstrate the process of mounting the components on the PCB.
- Demonstrate the process of operating the through-hole machine for automated assembling.
- Undertake preventive maintenance of the machine.

#### Duration: 45:00 Duration: 60:00 **Practical - Key Learning Outcomes Theory - Key Learning Outcomes** Describe the role and responsibilities Identify and collect required of a Sr. Operator - Through Hole through-hole components as per the Assembly; explain the scope of Bill of Materials (BOM) and assembly through-hole technology drawings. electronics manufacturing and the Assemble PCB components using use of axial/radial insertion **Axial and Radial Insertion Machines** digital machines, assembly instructions, and related tools for Place through-hole components correctly on the PCB following efficient PCB assembly. polarity and orientation guidelines. Understand the concept and Perform manual soldering of importance of through-hole through-hole components using technology in PCB assembly. proper soldering techniques and Identify different types of throughtools. hole components and their symbols, Inspect solder joints for quality and pin configuration, and polarity. rectify common defects like cold Explain the steps involved in manual joints or solder bridges. through-hole component placement Handle components and PCBs using and soldering. appropriate ESD safety measures and Describe the tools and materials tools. used in through-hole assembly, such Clean the PCB after soldering and as soldering iron, flux, and solder check for component stability and wire. alignment. Understand PCB layout, component Record assembly data and report any legends, and hole alignment issues or deviations as per standard techniques. operating procedures. Explain common defects in throughhole soldering and their causes (e.g., cold solder joints, solder bridges). Understand ESD precautions, safety guidelines, and quality standards relevant to through-hole assembly (e.g., IPC-A-610).

#### **Classroom Aids**

#### Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Component Feeder, nozzles Solder Paste, Stencils, soldering tools, Hand tools such as tweezers, piers Cutter, Vernier Callipers, TH Component, Axial and Radial Insertion Machines, Manual Forming Machine, Desktop and programming software, PCB blueprint.

# **Module 2: Operate the Through-Hole Machine for Automated Assembling** *Mapped to ELE/N5114*

#### **Terminal Outcomes:**

- Operate through-hole insertion machines for automated component placement on PCBs as per specified assembly layouts and process parameters.
- Perform basic machine maintenance, troubleshoot common issues, and follow safety and ESD guidelines during machine operation.

| Duration: 45:00   | Duration: 60:00  |  |  |
|---|--|--|--|
| Theory - Key Learning Outcomes  | Practical - Key Learning Outcomes  |  |  |
| <ul> <li>Understand the working principles and functions of automated through-hole insertion machines.</li> <li>Identify various through-hole components compatible with automated insertion processes.</li> <li>Explain the setup procedures, machine parameters, and programming basics for automated assembly.</li> <li>Understand the role of feeders, insertion heads, conveyors, and PCB handling systems.</li> <li>Describe common faults, error codes, and basic troubleshooting techniques.</li> <li>Understand quality standards and inspection criteria relevant to automated through-hole assembly.</li> <li>Explain the importance of ESD safety, machine maintenance protocols, and workplace safety guidelines.</li> </ul> | <ul> <li>Set up the through-hole insertion machine with appropriate components, tools, and feeder units as per assembly requirements.</li> <li>Load PCBs and run automated insertion programs following standard operating procedures (SOPs).</li> <li>Monitor machine operation and ensure accurate component placement on the PCB.</li> <li>Use screen-based or Digital Assembly Instruction to replace printed manuals, enhancing assembly accuracy and reducing errors.</li> <li>Identify and respond to common machine errors, jams, or misalignments during the assembly process.</li> <li>Perform routine cleaning and basic maintenance of the machine for optimal performance.</li> <li>Follow ESD safety practices and workplace safety protocols while operating the equipment.</li> <li>Record production and quality data and communicate any defects or deviations to the supervisor.</li> </ul> |  |  |

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Sample Of Escalation Matrix, Organization Structure.

# **Module 3:** Maintain and Troubleshoot Through-Hole Assembly Equipment *Mapped to ELE/N5115*

#### **Terminal Outcomes:**

- Perform routine maintenance and servicing of through-hole assembly equipment to ensure optimal and safe functioning.
- Identify, diagnose, and troubleshoot common mechanical and operational issues in through-hole machines, following safety and quality standards.

| Duration: 45:00   | Duration: 60:00   |
|---|---|
| Theory – Key Learning Outcomes  | Practical - Key Learning Outcomes   |
| <ul> <li>Understand the structure,<br/>components, and working principles<br/>of through-hole assembly<br/>equipment.</li> </ul>          | <ul> <li>Perform routine cleaning,<br/>lubrication, and preventive<br/>maintenance of through-hole<br/>assembly machines as per SOPs.</li> </ul>                  |
| <ul> <li>Describe the importance of regular<br/>maintenance and its impact on<br/>machine performance and product<br/>quality.</li> </ul> | <ul> <li>Identify and troubleshoot common<br/>mechanical or electrical issues such<br/>as misalignment, feed errors, or<br/>soldering faults.</li> </ul>          |
| <ul> <li>Identify common mechanical,<br/>electrical, and software-related<br/>issues in through-hole insertion<br/>machines.</li> </ul>   | <ul> <li>Use diagnostic tools and indicators<br/>to detect faults and verify machine<br/>status.</li> </ul>   |
| <ul> <li>Understand standard<br/>troubleshooting methods, tools, and<br/>diagnostic procedures.</li> </ul>                                | <ul> <li>Replace worn-out or faulty parts and<br/>calibrate machine settings as<br/>required.</li> </ul>  |
| <ul> <li>Interpret error codes, maintenance<br/>logs, and machine manuals for<br/>problem-solving.</li> </ul>                             | <ul> <li>Follow safety procedures, including lockout/tagout (LOTO), while performing maintenance activities.</li> <li>Document maintenance activities,</li> </ul> |
| <ul> <li>Explain safety protocols and<br/>lockout/tagout (LOTO) procedures<br/>during maintenance and repair.</li> </ul>                  | issues identified, and corrective actions taken in maintenance logs.  • Coordinate with the supervisor or   |
| <ul> <li>Understand documentation<br/>practices related to maintenance<br/>records and issue reporting.</li> </ul>                        | maintenance team for unresolved or complex issues.  |

#### Classroom Aids

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

### **Tools, Equipment and Other Requirements**

Sample Of Escalation Matrix, Organization Structure.

# **Module 4: Employability Skills (30 Hours)** *Mapped to DGT/VSQ/N0101*

#### **Terminal Outcomes:**

- Discuss about Employability Skills in meeting the job requirements
- Describe opportunities as an entrepreneur.
- Describe ways of preparing for apprenticeship & Jobs appropriately.

| Duration: 30:00   | Duration: 00:00                   |
|---|-----------------------------------|
| Theory - Key Learning Outcomes  | Practical - Key Learning Outcomes |
| <ul> <li>Explain constitutional values, civic<br/>rights, responsibility towards society<br/>to become a responsible citizen</li> </ul> |                                   |
| <ul> <li>Discuss 21<sup>st</sup> century skills</li> </ul>  |                                   |
| <ul> <li>Explain use of basic English phrases<br/>and sentences.</li> </ul>   |                                   |
| <ul> <li>Demonstrate how to communicate in<br/>a well-behaved manner</li> </ul>   |                                   |
| <ul> <li>Demonstrate how to work with<br/>others</li> </ul>   |                                   |
| <ul> <li>Demonstrate how to operate digital devices</li> </ul>  |                                   |
| <ul> <li>Discuss the significance of Internet<br/>and Computer/ Laptops</li> </ul>  |                                   |
| <ul> <li>Discuss the need for identifying<br/>business opportunities</li> </ul>   |                                   |
| <ul> <li>Discuss about types of customers.</li> </ul>   |                                   |
| Discuss on creation of biodata  |                                   |
| <ul> <li>Discuss about apprenticeship and opportunities related to it.</li> </ul>   |                                   |
|   |                                   |

#### Classroom Aids

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Computer, UPS, Scanner, Computer Tables, LCD Projector, Computer Chairs, White Board

OR

**Computer Lab** 

# Module 5: On-the-Job Training Mapped to Through Hole Assembly Operator

Mandatory Duration: 195:00 Recommended Duration: 00:00

**Location: On Site** 

#### **Terminal Outcomes**

- 1. Check the placement and that inserted components are straight.
- 2. Hand over the assembled boards to wave solder machine operator.
- 3. Set up tools and parts to operate the machine.
- 4. Control the component insertion sequence and leads formation in order to match dimensions of holes with component.
- 5. Set the machine to zero setting in order to start the machine.
- 6. Maintain machine to avoid unscheduled downtime.

#### **Assessment Strategy**

- 1. Assessment System Overview:
  - Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
  - Assessment agencies send the assessment confirmation to VTP/TC looping SSC
  - The assessment agency deploys the ToA certified Assessor for executing the assessment
  - SSC monitors the assessment process & records
- 2. Testing Environment

To ensure a conducive environment for conducting a test, the trainer will:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be 10 a.m. and 5 p.m. respectively
- Ensure there are 2 Assessors if the batch size is more than 30.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.
- 3. Assessment Quality Assurance levels / Framework:
  - Question papers created by the Subject Matter Experts (SME)
  - Question papers created by the SME verified by the other subject Matter Experts
  - Questions are mapped with NOS and PC
  - Question papers are prepared considering that level 1 to 3 are for the unskilled & semiskilled individuals, and level 4 and above are for the skilled, supervisor & higher management
  - The assessor must be ToA certified and the trainer must be ToT Certified
  - The assessment agency must follow the assessment guidelines to conduct the assessment
- 4. Types of evidence or evidence-gathering protocol:
  - Time-stamped & geotagged reporting of the assessor from assessment location
  - Centre photographs with signboards and scheme-specific branding
  - Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
  - Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos
- 5. Method of verification or validation:

To verify the details submitted by the training centre, the assessor will undertake:

- A surprise visit to the assessment location
- A random audit of the batch
- A random audit of any candidate

6. Method for assessment documentation, archiving, and access

To protect the assessment papers and information, the assessor will ensure:

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored on the Hard drive
