

# **Model Curriculum**

**NOS Name:** Industrial Safety for Semiconductor Manufacturing - Hazchem

NOS Code: ELE/N1006

NOS Version: 1.0

**NSQF Level: 5** 

**Model Curriculum Version: 1.0** 

Electronic Sector Skill Council of India | 155, 2<sup>nd</sup> Floor ESC House, Okhla Industrial Area – Phase 3, New Delhi - 110020

# **Training Parameters**

Sector	Electronics
Sub-Sector	Semiconductor & Components
Occupation	Safety
Country	India
NSQF Level	5
Aligned to NCO/ISCO/ISIC Code	NCO-2015/3119.1100
Minimum Educational Qualification and Experience	Completed 2nd year of UG (UG Diploma) (Graduation B.sc/B.tech/B.E- Electrical/Electronics/Mechanical) with 1 Year of experience Relevant Experience OR Diploma (After 10 Electronics/Electrical/Mechanical) with 1 Year of experience relevant Experience OR 12th grade Pass with 2 Years of experience relevant Experience OR 10th grade pass with 4 Years of experience relevant Experience
Pre-Requisite License or Training	NA
Minimum Job Entry Age	21
Last Reviewed On	31/01/2024
Next Review Date	31/01/2027
NSQC Approval Date	31/01/2024
NOS Version	1.0
Model Curriculum Creation Date	
Model Curriculum Valid Up to Date	

Model Curriculum Version	1.0
Maximum Duration of the Course	60

# **Program Overview**

This section summarizes the end objectives of the program along with its duration.

## **Training Outcomes:**

At the end of the program, the learner should have acquired the listed knowledge and skills:

## Compulsory:

- Basic lecture introduces different aspects of Electronics and exposure to the current activities at a particular.
- Provides exposure to the infrastructure available at the Semiconductor in the form of series of lectures
  and application notes. This would provide in-depth information about the equipment and their
  capabilities.
- The lecture series is organized as modules, such as Industrial Safety/Hazchem and personnel Protective etc.

## **Compulsory Modules:**

The table lists the modules and their duration corresponding to the Compulsory NOS of the QF.

NOS and Module Details	Theory / Demonstra tion Duration (In Hours)	Practical/OJT Duration (In Hours)	On-the-Job Training Duration (in hours) (Mandatory)	On-the-Job Training Duration (in hours) (Recommended)	Total Duration (In Hours)
Module 1 (Introduction to the Basics of semiconductor)	20:00	00:00	00:00	00:00	20:00
ELE/NXXXX	20:00	00:00	00:00	00:00	20:00
Module 2 (Industrial Safety for Hazchem)	10:00	30:00	00:00	00:00	40:00
ELE/NXXXX	10:00	30:00	00:00	00:00	40:00
<b>Total Duration</b>	30:00	30:00	00:00	00:00	60:00

# **Module Details**

Module 1: Introduction to the Basics of semiconductor

**Terminal Outcomes:** 

- Explain the basic concepts of Electronics
- Explain the basic concepts of Semiconductor Physics

Duration: 20:00 hrs

# **Theory - Key Learning Outcomes**

- Basic concepts of Electronics
- Basics of Semiconductor Physics

# **Tools, Equipment and Other Requirements**

Labs equipped with the following:

- PCs/Laptops
- Notepad and pens
- Internet with Wi-Fi (Min 2 Mbps dedicated)

Module 2: Industrial Safety for Semiconductor manufacturing- Hazchem

## **Terminal Outcomes:**

- Learning about the Hazchem safety and precautions
- Various Personnel Protective Equipment

Duration: 10:00 hrs

### **Theory - Key Learning Outcomes**

- List GHS of classification and Labeling of Chemicals with all 9 pictograms and their implications
- Identify the information contained in a Material Safety Data Sheet
- List, describe, and identify safety hazards, hazard alert symbols, and personal protective equipment associated with Manufacturing Systems
- Describe each process stage of semiconductor manufacturing systems

Duration: 30:00 hrs

### **Practical - Key Learning Outcomes**

- Describe the hazardous chemicals and gases associated with each process stage of semiconductor manufacturing systems
- Describe the hazardous wastes associated with Manufacturing Systems
- List the storage hazards and demonstrate storage processes for liquid, solids and gases
- Locate all emergency machine off buttons and describe how to EMO Manufacturing Systems
- Describe and perform Lockout/Tagout procedures for Manufacturing Systems
- Safely perform tasks (including LOTO) while working on and around Manufacturing Systems
- Demonstrate PPE Selection, testing, correct use, disposal
- List control systems (admin as well as system controls) in Hazchem practice/ identify
  the control systems deployed in practice site

# Classroom Aids: (If Offline mode)

- Whiteboard and Markers
- Chart paper and sketch pens
- LCD Projector and Laptop for presentations

# **Tools, Equipment and Other Requirements**

Labs equipped with the following:

- PCs/ Laptops
- Notepad and pens
- Internet with Wi-Fi (Min 2 Mbps dedicated)

# **Annexure**

# **Trainer Requirements**

Trainer Prerequisites						
Minimum Educational	Specialization	Relevant Industry Experience		Training Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
Post Graduate Science & Engineering	Electrical/ Physics	2	Semiconductor Technology	1	Semiconductor Technology	

Trainer Certification		
Domain Certification	Platform Certification	
"Industrial Safety for Semiconductor Manufacturing - HazChem, ELE/N1006, version 1.0". Minimum accepted score is 80%.	Recommended that the Trainer is certified for the Industrial Safety for Semiconductor Manufacturing - HazChem "Trainer (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2601, V2.0", with minimum score of 80%	

Assessor Prerequisites						
Minimum Educational	Specialization	Relevant Industry Experience		Training/Assessment Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
Post Graduate Science & Engineering	Electrical/ Physics	3	Semiconductor Technology	2	Semiconductor Technology	

Assessor Certification			
Domain Certification	Platform Certification		
"Industrial Safety for Semiconductor Manufacturing - HazChem, ELE/N1006, version 1.0". Minimum accepted score is 80%.	Recommended that the Assessor is certified for the Industrial Safety for Semiconductor  Manufacturing - HazChem "Assessor (VET and Skills)", mapped to the Qualification Pack:  "MEP/Q2701, V2.0", with minimum score of 80%		

# **Assessment Strategy**

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
- · Assessment agencies send the assessment confirmation to VTP/TC looping SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- · SSC monitors the assessment process & records

### 2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- · Check the duration of the training.
- · Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.
- · If the batch size is more than 30, then there should be 2 Assessors.
- · Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- · Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- · Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

### 3. Assessment Quality Assurance levels / Framework:

- · Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- · Questions are mapped with NOS and PC
- Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment

### 4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- · Centre photographs with signboards and scheme specific branding
- · Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period

- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs
   & videos
- 5. Method of verification or validation:
  - · Surprise visit to the assessment location
  - · Random audit of the batch
  - · Random audit of any candidate
- 6. Method for assessment documentation, archiving, and access
  - · Hard copies of the documents are stored
  - Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
  - · Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

# **Glossary**

Term	Description
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical/OJT application).
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do <b>upon the completion of the training</b>
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do <b>upon the completion of a module</b> . A set of terminal outcomes help to achieve the training outcome.
National Occupational Standard	National Occupational Standard specify the standard of performance an individual must achieve when carrying out a function in the workplace

Persons with Disability

Persons with Disability are those who have long-term physical, mental, intellectual, or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis with others
