## **Training Parameters**

Sector	Electronics
Sub-Sector	Industrial Automation
Occupation	Engineering – I&A
Country	India
NSQF Level	5
Aligned to NCO/ISCO/ISIC Code	NCO-2015/7412.0101
Minimum Educational Qualification and Experience	Diploma (after 10 (Electrical/Electronics)) with 1 Year of experience relevant experience OR 12th grade pass with 1 year NTC/ NAC with 1 Year of experience relevant experience OR 12th grade Pass with 2 Years of experience relevant experience OR Previous relevant Qualification of NSQF Level (4) with 3 Years of experience relevant experience OR 10th grade pass with 4 Years of experience relevant experience
Pre-Requisite License or Training	NA
Minimum Job Entry Age	21 Years
Last Reviewed On	24.02.2022
Next Review Date	24.02.2025
NSQC Approval Date	24.02.2022
QP Version	2.0
Model Curriculum Creation Date	24.02.2022

Model Curriculum Valid Up to Date	24.02.2025
Model Curriculum Version	2.0
Maximum Duration of the Course	600 Hours

## **Program Overview**

This section summarizes the end objectives of the program along with its duration.

#### **Training Outcomes**

At the end of the program, the learner should have acquired the listed knowledge and skills:

- Demonstrate the process of setting up circuits and electrical components in the mechatronics system.
- Demonstrate the process of installing, testing and using the sensors and actuators in the mechatronics system.
- Demonstrate the process of installing, testing and using microcontrollers in the mechatronics system.
- Explain the importance of following inclusive practices for all genders and PwD at work.
- Demonstrate the use of relevant health and safety equipment at work.

#### **Compulsory Modules**

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

NOS and Module Details	Theory Duration	Practical Duration	On-the-Job Training Duration (Recommended)	On-the-Job Training Duration (Mandatory)	Total Duration
Bridge Module	21:00	39:00	00:00	00:00	60:00
Module 1: Introduction and orientation to the role of a Mechatronics Maintenance Specialist	21:00	39:00	00:00	00:00	60:00
ELE/N7109 Set up circuits and electrical components in the mechatronics system	30:00	60:00	00:00	60:00	150:00
Module 2: Process of setting up circuits and electrical components in the mechatronics system	30:00	60:00	00:00	60:00	150:00
ELE/N7110 Install, test and use the sensors and actuators in the mechatronics system	60:00	60:00	00:00	30:00	150:00
Module 3: Process of installing, testing and using the sensors and actuators in the mechatronics system	60:00	60:00	00:00	30:00	150:00

ELE/N7111 Install, test and use microcontroller in the mechatronics system	30:00	60:00	00:00	60:00	150:00
Module 4: Process of installing, testing and using microcontroller in the mechatronics system	30:00	60:00	00:00	60:00	150:00
ELE/N1002 Apply health and safety practices at workplace	15:00	15:00	00:00	00:00	30:00
Module 5: Basic Health and Safety Practice	15:00	15:00	00:00	00:00	30:00
DGT/VSQ/N0102- Employability Skills (60 Hours)	24:00	36:00	00:00	00:00	60:00
Module 6: Employability Skills (60 Hours)	24:00	36:00	00:00	00:00	60:00
Total Duration	180:00	270:00	00:00	150:00	600:00

## **Module Details**

# Module 1: Introduction and orientation to the role of a Mechatronics Maintenance Specialist

#### **Terminal Outcomes:**

• Describe the job role of a Mechatronics Maintenance Specialist.

Duration: 21:00	Duration: 39:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul> <li>Describe the size and scope of the Electronics industry and its subsectors</li> <li>Discuss the role and responsibilities of a Mechatronics Maintenance Specialist.</li> <li>Discuss various employment opportunities for a Mechatronics Maintenance Specialist in the Electronics industry.</li> <li>State the organisational policies on</li> </ul>	<ul> <li>Familiarization with the Mechatronics Software</li> <li>Awareness of Industry 4.0</li> </ul>
incentives, personnel management reporting structure, etc.	
Classroom Aids	
Training Kit - Trainer Guide, Presentations, Whit	eboard, Marker, Projector, Laptop
Tools, Equipment and Other Requirements	
NA	

# Module 2: Process of setting up circuits and electrical components in the mechatronics system Mapped to ELE/N7109

#### **Terminal Outcomes:**

- Demonstrate the process of Setting up microcontrollers.
- Demonstrate the process of Setting up circuits, electrical components and pneumatic systems.

Duration: 30:00	Duration: 60:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul> <li>Explain the need and scope of the mechatronics system.</li> <li>Explain the mechatronics system and its scope in the automation sector.</li> <li>Explain the traditional vs. mechatronics approach.</li> </ul>	<ul> <li>Demonstrate the process of testing the mechatronics components to ensure they are functioning correctly.</li> <li>Demonstrate the process of installing the mechatronics control system and the hardware interfacing units of microcontrollers.</li> </ul>
<ul> <li>Explain how to interpret the block diagram representation of a general mechatronics system showing various components with suitable examples.</li> <li>Explain relevant control systems such</li> </ul>	<ul> <li>Demonstrate the process of testing the microcontrollers for the correct functioning and carrying out troubleshooting for the issues identified.</li> </ul>
as open and closed-loop systems, basic elements of the closed-loop system.	Demonstrate how to test the electrical components and circuits for correct functioning and
Explain the basic circuit concepts.	compatibility with the mechatronics
<ul> <li>Explain the semiconductor circuit elements.</li> <li>Explain different types of circuits used in mechatronic devices.</li> </ul>	<ul> <li>system.</li> <li>Demonstrate the process of performing sequence control and using the logic functions for operating the pneumatic system.</li> </ul>
<ul> <li>Explain how to interpret the pneumatic symbols in pneumatic systems.</li> </ul>	<ul> <li>Demonstrate how to use relays in the pneumatic system.</li> </ul>
<ul> <li>Describe the function and operation of pneumatic valves.</li> </ul>	<ul> <li>Demonstrate how to monitor the pneumatic fluid by analysing the speed and pressure control sensors.</li> </ul>
<ul> <li>Describe the logic functions used in the pneumatic system.</li> </ul>	<ul> <li>Demonstrate the process of carrying out troubleshooting for any issues</li> </ul>
<ul> <li>Describe the function of relays and their working in the pneumatic system.</li> </ul>	encountered with the pneumatic system.
Explain the need for the proximity	<ul> <li>Demonstrate how to design the cascade circuits.</li> </ul>
sensor and its application in a pneumatic cylinder.	<ul> <li>Demonstrate the process of installing the pneumatic power system.</li> </ul>
Explain the design of cascade circuits.	Demonstrate the process of carrying

- Describe the process of programming PLCs in the Ladder diagram.
- Explain the principles of operation, characteristics and applications of power semiconductor devices.
- Explain the characteristics of power semiconductor devices and circuits.
- Explain the concept of fluid power.
- Explain the relevant case studies for implementing the pneumatic system in the automatic production line.

out maintenance of the circuits, electrical components and pneumatic system.

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Align, Fit and Assemble Component Parts Using Hand Tools, Power Tools, Fixtures, Templates and Microscopes

# Module 3: Process of installing, testing and using the sensors and actuators in the mechatronics system Mapped to ELE/N7110

#### **Terminal Outcomes:**

• Demonstrate the process of installing, testing and using the sensors and actuators.

Duration: 60:00	Duration: 60:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul> <li>Explain the use of contact and noncontact type sensors.</li> <li>Explain the functions and application of Potentiometer Sensors, Strain Gauge Elements, Capacitive Elements, Eddy Current, Pressure Sensors, Pneumatic, Pyro Electrical, Piezoelectric Sensors etc.</li> <li>Explain the criteria for selecting sensors for use.</li> <li>Explain the classification, need and scope of different types of actuators.</li> <li>Describe the process of pneumatic actuation, hydraulic actuation and double-acting.</li> <li>Explain the use of different types of motors such as vane motors.</li> <li>Explain the components of electrical actuation systems such as switching devices, keypads, electromechanical and solid-state relays, stepper motors etc.</li> <li>Explain the criteria for the selection of different types of actuators.</li> <li>Explain how to carry out repair and maintenance of sensors and actuators in a mechatronics system.</li> </ul>	<ul> <li>Demonstrate the process of installing the selected sensors such as the potentiometer sensor following the standard procedure.</li> <li>Demonstrate how to test the sensors for correct functioning after installation.</li> <li>Demonstrate how to check the working of the strain gauge sensor and measure the torque applied by the motor.</li> <li>Demonstrate how to use the capacitive element by replacing the mechanical buttons.</li> <li>Demonstrate how to use the inductive sensor to measure high precision measurements of displacement, distance, oscillation in harsh industrial environments.</li> <li>Demonstrate the use of the pneumatic and pyro-electric and piezoelectric sensors.</li> <li>Demonstrate the process of carrying out repair and maintenance of sensors.</li> <li>Demonstrate the process of installing an actuator with the appropriate properties according to the need</li> <li>Demonstrate how to use the appropriate interface circuitry to match the actuator to the system driving it.</li> <li>Demonstrate how to test the actuator for correct functioning after</li> </ul>

installation.

- Demonstrate the process of carrying out troubleshooting for any issues identified with the installed hydraulic and pneumatic actuator as per the sketches and block diagrams.
- Demonstrate the process of install and using the vane motor as per the standard procedure.
- Demonstrate how to control a highpowered circuit using a lower power signal through electro-mechanical and solid-state relays.
- Demonstrate how to use the stepper motor to convert electrical power into mechanical power.
- Demonstrate how to create analytical design and development solutions for actuators for different applications.
- Demonstrate the process of carrying out repair and maintenance of actuators.

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Electromechanical Assemblies, Test Instruments Such as Oscilloscopes, Electronic Voltmeters and Bridges.

# Module 4: Process of installing, testing and using microcontroller in the mechatronics system Mapped to ELE/N7111

#### **Terminal Outcomes:**

• Demonstrate the process of installing, testing and using the microcontroller.

the temperature with a temperature sensor using a microcontroller circuit.

- Describe the process of interfacing experiments of A/D and D/A using the appropriate type of microprocessor.
- Describe the process of interfacing and programming of Stepper motor using the appropriate type of microcontroller.
- Describe the process of interfacing and programming of the ARM processor with a Stepper Motor.
- Demonstrate how to carry out repair and maintenance of microcontrollers in the mechatronics system.

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Common Hand and Power Tools, Such as Hammers, Hoists, Saws, Drills and Wrenches, to Precision Measuring Instruments and Electrical and Electronic Testing Device

# Module 5: Basic Health and Safety Practice *Mapped to ELE/N1002*

#### **Terminal Outcomes:**

• Apply health and safety practices at the workplace.

Duration: 15:00	Duration: 15:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul> <li>Discuss job-site hazards, risks and accidents.</li> <li>Explain the organizational safety procedures for maintaining electrical safety, handling tools and hazardous materials.</li> <li>Elaborate on electronic waste disposal procedures.</li> <li>Describe the process of disposal of hazardous waste</li> <li>List the name and location of concerned people, documents and equipment for maintaining health and safety in the workplace.</li> <li>Describe how to interpret warning signs while accessing sensitive work areas.</li> <li>Explain the importance of good housekeeping.</li> <li>Describe the importance of maintaining appropriate postures while lifting heavy objects.</li> <li>List the types of fire and fire extinguishers.</li> <li>Explain the importance of efficient utilisation of water, electricity and other resources.</li> <li>List the common sources of pollution and ways to minimize it.</li> <li>Describe the concept of waste management and methods of disposing hazardous waste.</li> <li>Explain various warning and safety signs.</li> <li>Describe different ways of preventing accidents at the workplace.</li> </ul>	<ul> <li>Demonstrate the use of protective equipment suitable as per tasks and work conditions.</li> <li>Prepare a report to inform the relevant authorities about any abnormal situation/behaviour of any equipment/system.</li> <li>Administer first aid in case of a minor accident.</li> <li>Demonstrate the steps to free a person from electrocution safely.</li> <li>Administer Cardiopulmonary Resuscitation (CPR).</li> <li>Demonstrate the application of defined emergency procedures such as raising alarm, safe/efficient, evacuation, moving injured people, etc.</li> <li>Prepare a sample incident report.</li> <li>Use a fire extinguisher in case of a fire incident.</li> <li>Demonstrate the correct method of lifting and handling heavy objects.</li> </ul>

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Personal Protection Equipment: Safety Glasses, Head Protection, Rubber Gloves, Safety Footwear, Warning Signs and Tapes, Fire Extinguisher, First Aid Kit, Fire Extinguishers and Warning Signs.

# Module 6: Employability Skills (60 Hours) Mapped to DGT/VSQ/N0102

#### **Terminal Outcomes:**

- Discuss about Employability Skills in meeting the job requirements
- Describe opportunities as an entrepreneur.
- Describe ways of preparing for apprenticeship & Jobs appropriately.

Duration: 24:00	Duration: 36:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul> <li>Explain constitutional values, civic rights, responsibility towards society to become a responsible citizen</li> </ul>	<ul> <li>List different learning and employability related GOI and private portals and their usage</li> </ul>
<ul> <li>Discuss 21<sup>st</sup> century skills</li> </ul>	Show how to practice different
<ul> <li>Explain use of basic English phrases and sentences.</li> </ul>	environmentally sustainable practices.
Demonstrate how to communicate in a well-behaved manner	<ul> <li>Exhibit 21st century skills like Self- Awareness, Behavior Skills, time management, etc.</li> </ul>
Demonstrate how to work with others	<ul> <li>Show how to use basic English sentences for everyday conversation in different</li> </ul>
Demonstrate how to operate digital devices	<ul> <li>contexts, in person and over the telephone</li> <li>Demonstrate how to communicate in a well</li> <li>-mannered way with others.</li> </ul>
<ul> <li>Discuss the significance of Internet and Computer/ Laptops</li> </ul>	Demonstrate how to communicate effectively using verbal and
<ul> <li>Discuss the need for identifying business opportunities</li> </ul>	nonverbal communication etiquette  Utilize virtual collaboration tools to work
Discuss about types of customers.	effectively
<ul><li>Discuss on creation of biodata</li><li>Discuss about apprenticeship and</li></ul>	<ul> <li>Demonstrate how to maintain hygiene and dressing appropriately.</li> <li>Perform a mock interview</li> </ul>
opportunities related to it.	- Terrorin a model meet view

#### **Classroom Aids**

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

#### **Tools, Equipment and Other Requirements**

Computer, UPS, Scanner, Computer Tables, LCD Projector, Computer Chairs, White Board OR

Computer Lab

# Module 7: On-the-Job Training Mapped to Mechatronics Maintenance Specialist

Mandatory Duration: 150:00 Recommended Duration: 00:00

**Location: On-Site** 

#### **Terminal Outcomes**

- 1. Explain the basics of the mechatronics system and its scope in the automation sector.
- 2. Explain the traditional vs. mechatronics approach.
- 3. Explain different types of circuits used in mechatronic devices.
- 4. Explain the logic functions used in the pneumatic system.
- 5. Set up circuits, electrical components and pneumatic system.
- 6. Carry out maintenance of the circuits, electrical components and pneumatic system.
- 7. Install, test and use the sensors and actuators.
- 8. Carry out repair and maintenance of sensors and actuators.
- 9. Install, test and use the microcontroller.
- 10. Carry out repair and maintenance of microcontrollers.
- 11. Maintain a healthy, safe and secure working environment.

## **Annexure**

### **Trainer Requirements**

Trainer Prerequisites							
Minimum Educational	Specialization	Relevant Industry Training Experience Experience		•		•	Remarks
Qualification		Years	Specialization	Years	Specialization		
Diploma/	Electrical/ Electronics Engineering	3	Mechatronics	2	Electronics		
Degree			Maintenance				
			Specialist				
/ Certified in relevant CITS Trade							

Trainer Certification					
Domain Certification	Platform Certification				
"Mechatronics Maintenance Specialist", "ELE/Q7105, v2.0", Minimum accepted score is	Recommended that the Trainer is certified for the <b>Mechatronics Maintenance Specialist</b> "Trainer (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2601, V2.0", with minimum score of 80%				

### **Assessor Requirements**

Assessor Prerequisites						
Minimum Educational	Specialization	Relevant Industry Experience		Training/Assessment Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
Diploma/Degr ee/ Certified in relevant CITS Trade	Electrical/ Electronics Engineering	5	Mechatronics	2	Electronics	
			Maintenance Specialist			

Assessor Certification				
Domain Certification	Platform Certification			
"Mechatronics Maintenance Specialist", "ELE/Q7105, v2.0", Minimum accepted score is 80%	Recommended that the Assessor is certified for the <b>Mechatronics Maintenance Specialist</b> "Assessor (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2701, V2.0", with minimum score of 80%			

#### **Assessment Strategy**

- 1. Assessment System Overview:
  - Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
  - Assessment agencies send the assessment confirmation to VTP/TC looping SSC
  - The assessment agency deploys the ToA certified Assessor for executing the assessment
  - SSC monitors the assessment process & records
- 2. Testing Environment

To ensure a conducive environment for conducting a test, the trainer will:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be 10 a.m. and 5 p.m.
- Ensure there are 2 assessors if the batch size is more than 30.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.
- 3. Assessment Quality Assurance levels / Framework:
  - Question papers created by the Subject Matter Experts (SME)
  - Question papers created by the SME verified by the other subject Matter Experts
  - Questions are mapped with NOS and PC
  - Question papers are prepared considering that levels 1 to 3 are for the unskilled & semiskilled individuals, and levels 4 and above are for the skilled, supervisor & higher management
  - The assessor must be ToA certified & the trainer must be ToT Certified
  - The assessment agency must follow the assessment guidelines to conduct the assessment
- 4. Types of evidence or evidence-gathering protocol:
  - Time-stamped & geotagged reporting of the assessor from assessment location
  - Centre photographs with signboards and scheme-specific branding
  - Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
  - Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos
- 5. Method of verification or validation:

To verify the details submitted by the training centre, the assessor will undertake:

- A surprise visit to the assessment location
- A random audit of the batch
- A random audit of any candidate
- 6. Method for assessment documentation, archiving, and access

To protect the assessment papers and information, the assessor will ensure:

• Hard copies of the documents are stored

- Soft copies of the documents & photographs of the assessment are uploaded/accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard

## **References**

#### **Glossary**

Term	Description
Declarative knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood to accomplish a task or to solve a problem.
Key Learning	The key learning outcome is the statement of what a learner needs to know, understand and be able to do to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on the site
OJT (R)	On-the-job training (Recommended); trainees are recommended the specified hours of training on the site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do <b>upon the completion of the training</b> .
Terminal Outcome	The terminal outcome is a statement of what a learner will know, understand and be able to do <b>upon the completion of a module.</b> A set of terminal outcomes help to achieve the training outcome.
